

Vega G2

Outdoor Light

4000K

3500K

3000K

The Vega G2 is the perfect outdoor installation for its high resistance to impact, discolouring, and corrosion. Improved with longevity and more CCT alternatives, the luminaire is a versatile option for any outdoor setting.

Engineered for longevity

Engineered with longevity at the forefront, the Vega G2 is paired with the Unios G2 built-in driver and a new diffuser that minimises yellowing after prolonged use. Built to last, the product's warranty has also been updated to 5 years, backing its reliability.

Adjustable CCT

With a built-in CCT switch, the Vega G2 is the first Unios product to include an adjustable CCT feature. As a result, this luminaire now offers an additional 3500K lighting option, complementary to the existing 3000K and 4000K.

Flicker-free

The Vega G2 uses Unios G2 flicker-free non-dim driver that complies with all flicker-free standards, effectively improving the environment's light quality for all occupants.
